

**Windy Hill Poll Dorsets &
Basalt Border Leicesters**

8TH ANNUAL RAM SALE

THURSDAY 21ST SEPT

65 Dorset Rams ~ 15 Border Leicester Rams

ON-PROPERTY SALE

126 Halls Rd, Browns Creek ~ Inspections from 10.00am

AUCTION 12.00PM

**Chris & Fiona Roweth
0409 455 368**

**Campbell Roweth
0474 235 732**

**Lunch & refreshments available on the day
Catalogue via AWN Website. Pre-sale inspections welcome**

StockScan & Performance Recorded**

Welcome to Nullawonga

Welcome to Nullawonga, the home of Windy Hill Poll Dorsets and Basalt Border Leicesters — rock-solid rams that will blow your prime lambs in the right direction!

History

Windy Hill Poll Dorset Stud was registered in 2016 but the breeding of poll dorsets started in 1979 when Kevin Roweth founded the Errowan Poll Dorset Stud which existed until 1997. The flock was continued as an unregistered stud but still serviced clients and strived for better performing and higher yielding animals. As our client base grew and the results in the saleyards and abattoirs of the lambs sired by rams, we bred improved, we decided it was only logical to register our poll dorset flock which occurred in 2016. Windy Hill Poll Dorset Stud currently has 300 breeding ewes representing genetics from Ridgehaven, Gooramma, Armdale, Springwaters and Myrtle Vale Poll Dorset studs. The breeding objectives of Windy Hill Poll Dorset Stud are to breed poll dorset sheep that are robust with high growth rates, high yielding carcasses and can perform in the extremes of our climatic conditions.

Basalt Border Leicesters was established in October of 2020 with the foundation genetics sourced from Johnos and Jackson Border Leicester studs. We currently are aiming to join 85 ewes ahead of our fourth breeding season with the genetic line up including ewes purchased from Tenalba, Retallack, Geraldine and Gleneith as well as those studs previously mention. We aim to breed a ram that is ideally suit for all environments and that can handle the extremes of weather conditions with ease by being structural correct, adequate fat cover and easy doing sheep with high growth rates all while staying true to type as a maternal breed. In this drop of Rams, Cooinda, Gleneith, Tenalba and Johnos sires were used.

Latest News

In the last two years both studs have invested in several high-quality sires. With both studs increasing their stud ewe numbers these rams will be used along with our seasoned rams. We believe the sires both flocks have purchased will breed the sheep, we believe that will perform for our clients all while strengthening our ewe base so we can continue to breed better performing and more consistent rams in the years to come.

Windy Hill's Recent Purchases

Faraday Park 34/20 Purchased for \$3000

Estjam 1/20 Purchased for \$4750

Springwaters 63/20 Purchased for \$10,000

Cranbrook 133/21 Purchased for \$3200

Valley Vista 19/21 Purchased for the top price of \$10,000

Basalt's Recent Purchases

Cooinda 111/20 Purchased for the equal top price of \$6200

Cooinda 47/21 Purchased for \$2600

Tenalba 38/21 Purchased for the equal top price of \$7000

Tenalba 65/21 Also purchased for the equal top price of \$7000

We believe that this line up of rams is very consistent and fit within our breeding objectives with the first of the lambs available by the 2021 drop sires will be available in next year's sale.

2022 Drop Overview

The rams in this year's draft have been grown out on mixed lucerne based pastures and have supplemented with barley since 26/7/23. All Rams had their 7 in 1 +B12 booster, drenched with Startec and were backlined with Avenge post shearing on the 28/7/23. The rams were scanned on 15/08/23 for their Eye Muscle area and the Poll Dorset scanning results are in the catalogue and the Border Leicester's will be available on sale day. An updated weight for each ram will also be available on sale day. Any rams purchased are guaranteed so if there are any issues with fertility in the first twelve months, please contact us so we can resolve the problem.

Thank you for your support and patronage.

The Roweth Family

Understanding LAMBPLAN Maternal ASBVs

Rams with a more positive weaning weight (WWT) will, on average, produce lambs that grow quicker to weaning. This ram will produce lambs that are, on average, 0.4kg heavier than a ram with a 0 ASBV for WWT.	Rams with more positive ASBVs for post weaning weight (PWT) produce lambs that grow quicker and reach target weights in a shorter time. This ram will produce lambs that are, on average, 1.25kg heavier than a ram with a 0 ASBV for PWT.	Rams with more positive ASBVs for eye muscle depth (EMD) produce lambs that have a higher lean meat yield. This ram will produce lambs that have a 0.2mm deeper eye muscle than a ram with a 0 EMD ASBV.	Rams with a higher clean fleece weight (CFW) ASBV will produce progeny that cut more wool. This ram will produce progeny that, on average, cut 2.5% more wool than a ram with an ASBV of 0.	Worm egg count (WEC) ASBVs estimate an animal's genetic potential for resisting worm burdens. Lower WEC ASBVs are desirable. This ram will, on average, sire progeny that have 10% fewer eggs/gram than a ram with an ASBV of 0.
--	--	--	---	--

Trait	WWT (kg)	MWT (kg)	PWT (kg)	FAT (mm)	EMD (mm)	NLW (%)	CFW (%)	SC (cm)	WEC (%)	INDEX
ASBV	0.8	1.0	2.5	-0.4	0.4	4	5	0.6	-10	105.6
Acc	51	53	61	45	38	33	37	44	37	

Rams with more positive ASBVs for maternal weaning weight (MWT) will produce daughters which will wean heavier lambs. This ASBV reflects a combination of the daughter's ability to milk and provide a better maternal environment.	Rams with a more negative ASBV for fat will produce lambs that are leaner, at the same weight. This ram will produce lambs that are, on average, 0.2mm leaner at the GR site when compared to a ram with a FAT ASBV of 0.	Rams with a more positive number of lambs weaned (NLW) ASBV will sire daughters that wean a higher percentage of lambs. This ram with an ASBV of 4 will sire daughters which, on average, will wean 2% more lambs.	Rams with higher scrotal circumference (SC) ASBVs will sire daughters that are, on average, more fertile.	An index is a guide to the value of a ram for a particular market. Rams with higher indexes will produce lambs that are more suited to that particular breeding objective. In many cases the indexes used for maternal breeds are in \$ terms.
---	---	--	---	--

- An ASBV of 0 is the average of the 1990 drop.
- Note: A useful rule of thumb for converting ram ASBVs into lamb production differences is to simply halve the ASBV (as rams contribute half the genetics of the lamb).
- Accuracy - published as a percentage, is a reflection of the amount of effective information that is available to calculate the ASBV. All ASBVs are now published with accuracies. The higher the percentage, the closer the ASBV is to the true breeding value of the animal. Breeding values without accuracies are Flock Breeding Values (FBVs) and can only be compared within the flock.

About StockScan

Scanning Measurements: (Ultrasonic rib muscle scanning in live sheep)

Scanning for performance traits in animals has become a significant on-farm measuring tool for over 10 years within the stud industry. Scanners assess sheep at around 8 to 12 months of age for weight, Eye Muscle Width (A), Eye Muscle Depth (B) and Fat measurement (C), which allows us to calculate the Eye Muscle Area (EMA). Eye Muscle Area (EMA) to weight (LW) ratio is also calculated.

Meat Index

The meat index formula is based on the Eye Muscle Width, Depth and Fat measurements. A higher weighting is given to width (A) because it is more heritable while eye muscle depth (B) is influenced by environment factors. Fat (C) is penalized slightly. The resulting number is then adjusted for the age of the sheep, so the index is what the sheep's index would have been at eight months of age. The index is a way that a group of young sheep with different live weights, eye muscle dimensions and fat depth can be compared from within a breeder's own flock. The index is not a figure that should be used to compare with other breeder's flocks.

Insured with AUSURE?

Ausure Insurance Brokers have 150 representatives located in every state and territory of Australia and are independently owned and managed by local people.

The combined strength of Ausure allows us to negotiate national discounts on all types of general insurance so remember to see your local contact and be sure to obtain an obligation free quote to ensure you are not paying too much and more importantly have the correct cover in place.

- Farm • Crop • Business • Livestock • Bloodstock • Heavy Motor
- Public and Products Liability • Farm Contracting • Home and Contents
- Landlords • Boat & Caravan • Commercial and Residential Strata
- Motor Vehicle Insurance • Workers Compensation • Professional Indemnity
- Trade Credit • Management Liability
- in fact we can assist with every type of general insurance.
